CUROElevate

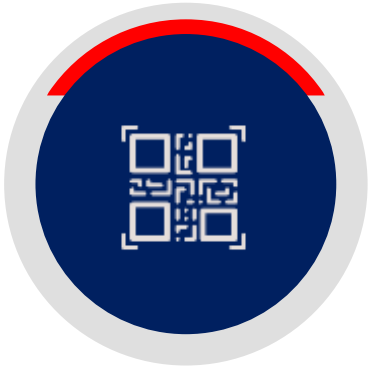
Features

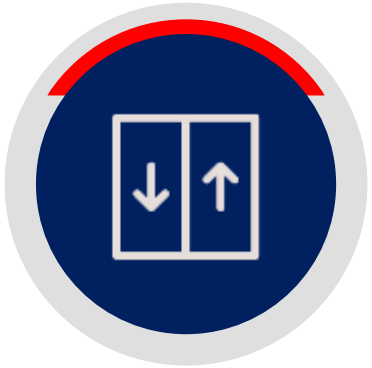
TOUCHLESS OPERATIONS

All Elevator operations can be done from mobile app … making elevator operation 100% touchless.



QR CODE ENABLED

Each lift is provided with unique QR Code to operate desired lift by user only when inside lift.



AUTO GEO LOCATION

App automatically finds current lift lobby using geo location to only allow operation within lift lobby.

MULTIPLE OPERATIONS

For better user experience and reduce chaos, app allows multiple floor selection once inside lift.

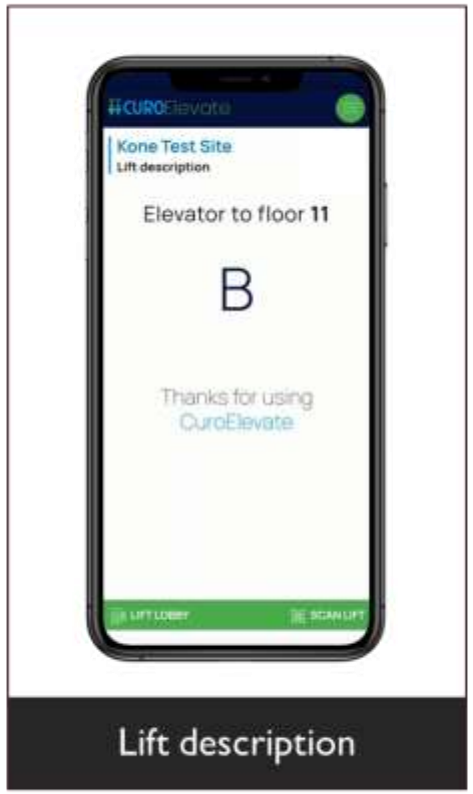
Lift calls- Individual/Group

Steps to use CuroElevate

Step-4

Destination floor selection

Step-5



Lift description

Private Access to Selected Floors

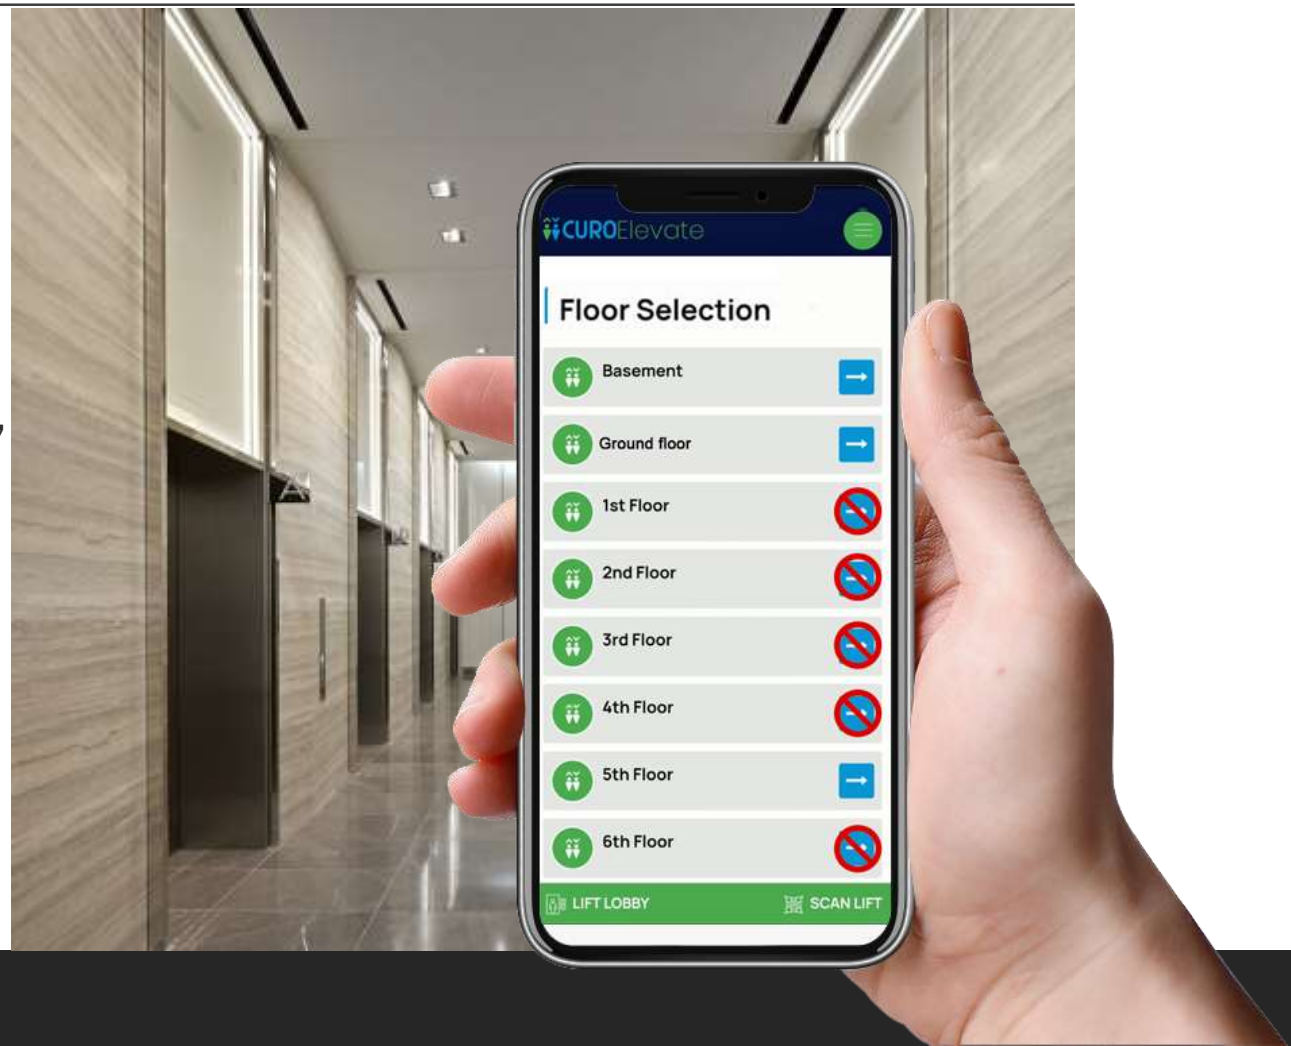
- There are important distinctions that can impact the safety of your facility. This is why a dedicated elevator access control system can be the key to keeping facility safe.

Access will only be granted to floors that his credentials allow.

CUROElevate

Private Access to Selected Floors

- Minimizes the transmission of infection from surfaces touched by a large number of people.
- GPS user location prevent the elevator from being called remotely, for example from home.
- Users will access to only his floor, ground floor or basement on their phone, these are the required floors, for quick selection.



CUROElevate

To Meet A Friend

In case if a resident wants to visit his\her friends in the same society to a different floor, will have to take access from society office.

An authorized person from security office will allow entry to your friend’s floor by filling residents credentials through web portal.

A **Nationwide Presence** Is Provided By **Radius**
