# About

- **CuroPark** is a one point parking solution.
- It is a commercial business centers and paid parking solution, designed and developed as per requirements of clients.
- It helps commercial building management to more efficiently manage parking allocation between companies and visitors.
- Solution will help in automation of day to day working of parking system. Also manage parking for cabs and guests.
- It facilitates first come first basis to the authorised person. Parking can be reserved for the senior management.
- Employees can view availability in their company parking real-time with mobile app.
- A person can search and pre-book the parking using mobile app and pay digitally.

## With Automation Solution

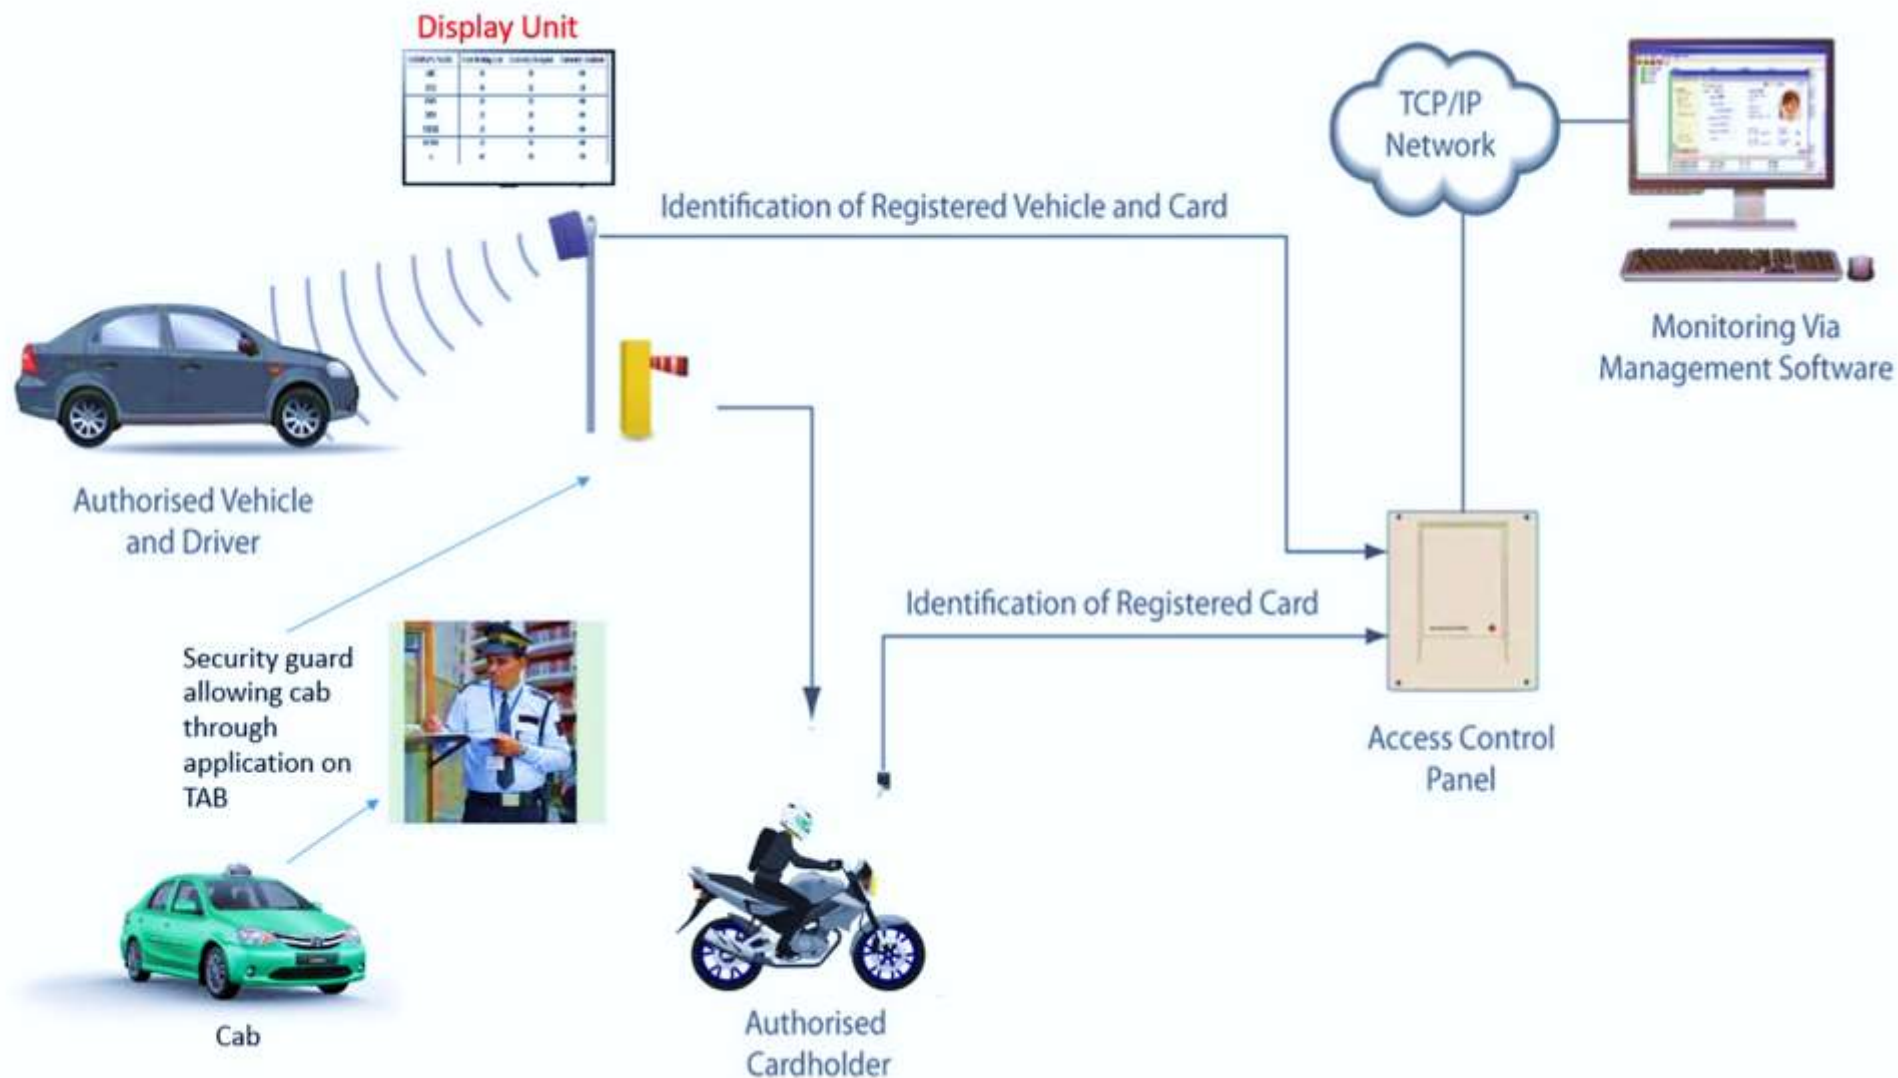

- Smooth and quick entry/exit
- Complete record of vehicle movement
- Low manpower requirement

- Real time parking availability information for employees of a company
- Pay without cash at parking

## Basic Purpose

- To avoid unauthorized parking.
- To avoid unnecessary chaos and traffic in campus and at entry and exit time.
- To keep transparency of parking slots available & occupied
- Smooth maintenance of allotted parking slots.
- Maintain complete database of all vehicle holder for any emergency.
- Manage Guests and Cabs.
- Maintain Security and avoid hazards.
- Keep proper records of all entry and exit vehicles.

# Solution Flow

## Some basic Features

### Some basic features of CuroPark

#### Employee Parking

Employees vehicles will be allowed in parking as per availability of parking associated with employees company. Company admin can reserve parking for employees.

#### Cabs Parking

All vendors and cabs allocated to company can be pre-defined in system. Cabs will be allowed only as per availability of parking associated with the company.

#### Guests Parking

Company admin can pre-define guests visiting in company. Guests can be given parking from company allocated parking or facility parking as per criteria set.

# Application

## IOT Automation

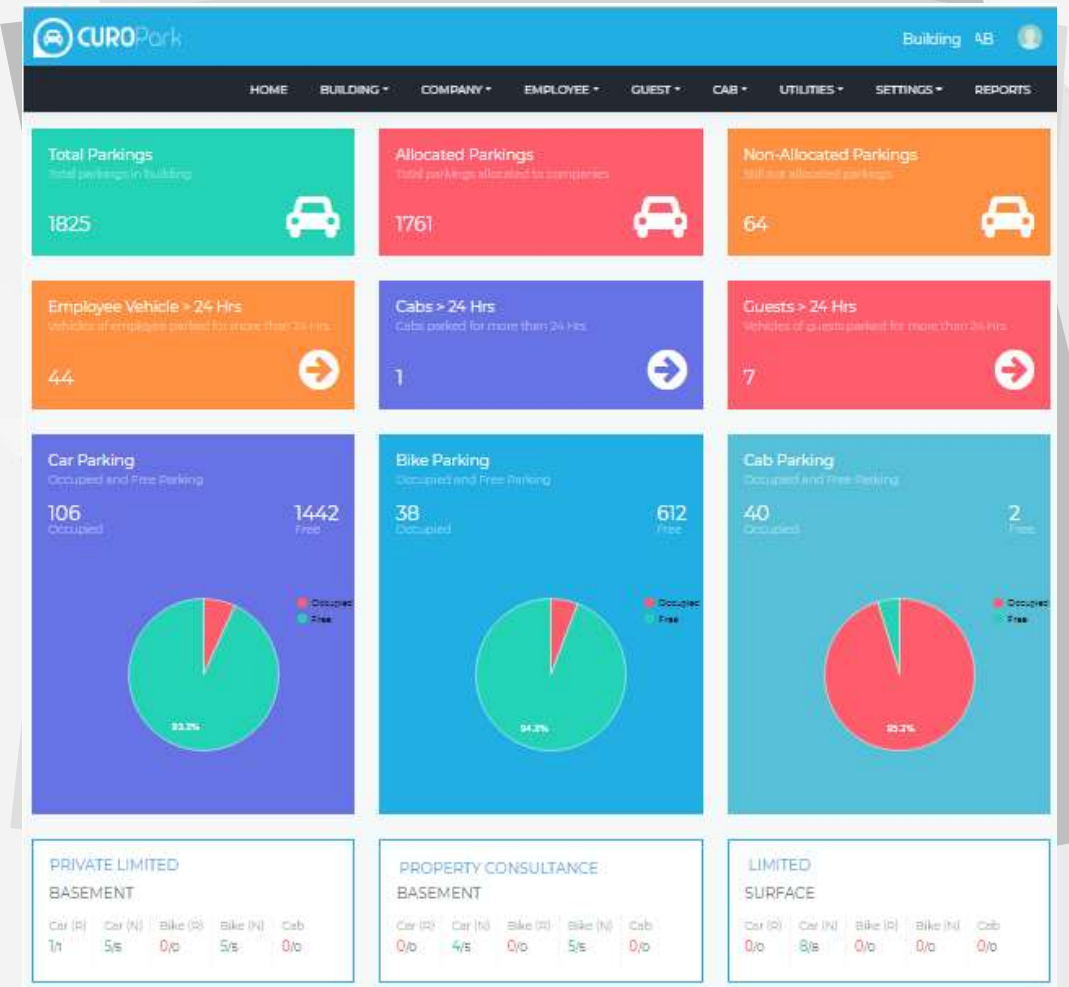

- Automated Tag reading/ANPR/ QR CODE for 4 wheelers.
- Separate Access Card based reader/ANPR/ QR CODE for 2 wheelers.
- Automated Barrier Operation for Entry/Exit.
- Entry allowed as per company parking availability.
- Maintains availability of company parking.
- Exit as per security settings by user.
- Block vehicle exit as per settings by building admin.
- Data to Cloud/Local Server.
- Works Offline.

# Web App

## Management Web Application

- Role based Management Application.
- Manage company parking/availability.
- Reserve Employee vehicle/Female Reservation.
- Manage Guests/Cabs/Vendors.
- Security settings for vehicle exit.
- Analyze data & view Entry/Exit Images.
- Management Reports.
- Blacklist Vehicles.

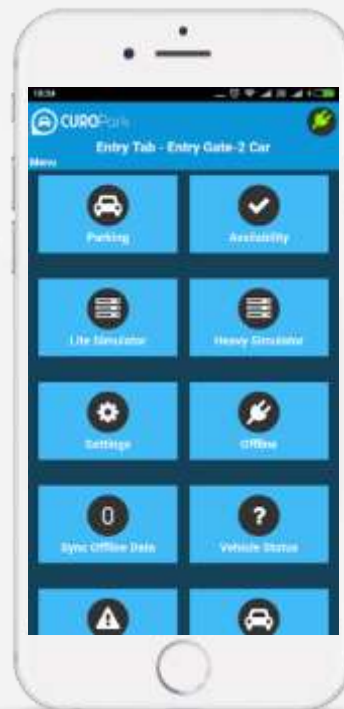

## CuroPark Mobile App

### Employee's Mobile App

- Single App for multiple buildings.
- View parking availability real time.
- View currently allocated parking slot.
- Change parking Slot.
- Set security settings for vehicle exit.
- Allow/Block vehicle exit.
- Company admin can add guests.

### Guard's Mobile App

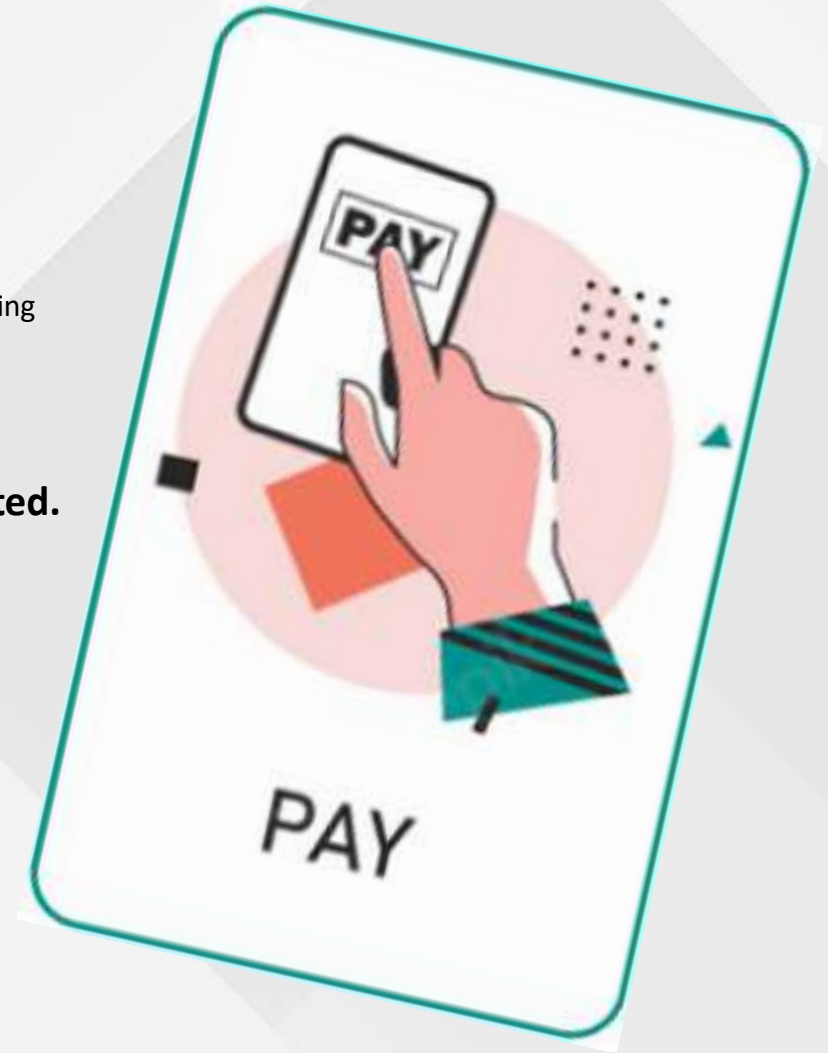

- View vehicle allowed/stopped status real time.
- View company parking availability.
- Check vehicle current parking status.
- Manage Employees/Guests/Cabs entry/exit.
- Allow/Block vehicle to exit.
- Manage Paid Parking.
- Maintains offline availability count and sync once online.

## In paid parking – Traditional payment modes

- In a traditional way we usually pay parking charges by using Debit Card/Credit Card/Net Banking/UPI/cash
- The problem in such payment modes are, they are time consuming, so there is a huge que while exiting the parking
- another big drawback is cash misappropriation.

**To solve such problems, people have started using FASTag for payment to get auto debited.  
But still we are facing issues i.e.**

- Stolen, Lost, or Damaged Tags
- Double-Deduction
- Possible Technical Glitches like tag stops working. In such cases, the RFID scanner might not detect your tag.
- Blacklisted FASTag
- FASTag is not on 100% vehicles

## How CuroPark is offering safe and secure payment option.

- To solve the issues regarding digital payment CuroPark came up with ANPR technology.
- QR codes are pasted at strategic locations so before moving out one can pay by scanning QR codes
- A unique automation to pay your parking fee by scanning QR codes
- All payment modes are accepted.

# CUROPark

## Paid Parking

### PRE BOOKING

- Book a parking and pay digitally
- Booking conformation alert with QR CODE
- Get flawless Entry and Exit through ANPR or QR code

### WALK-IN PARKING

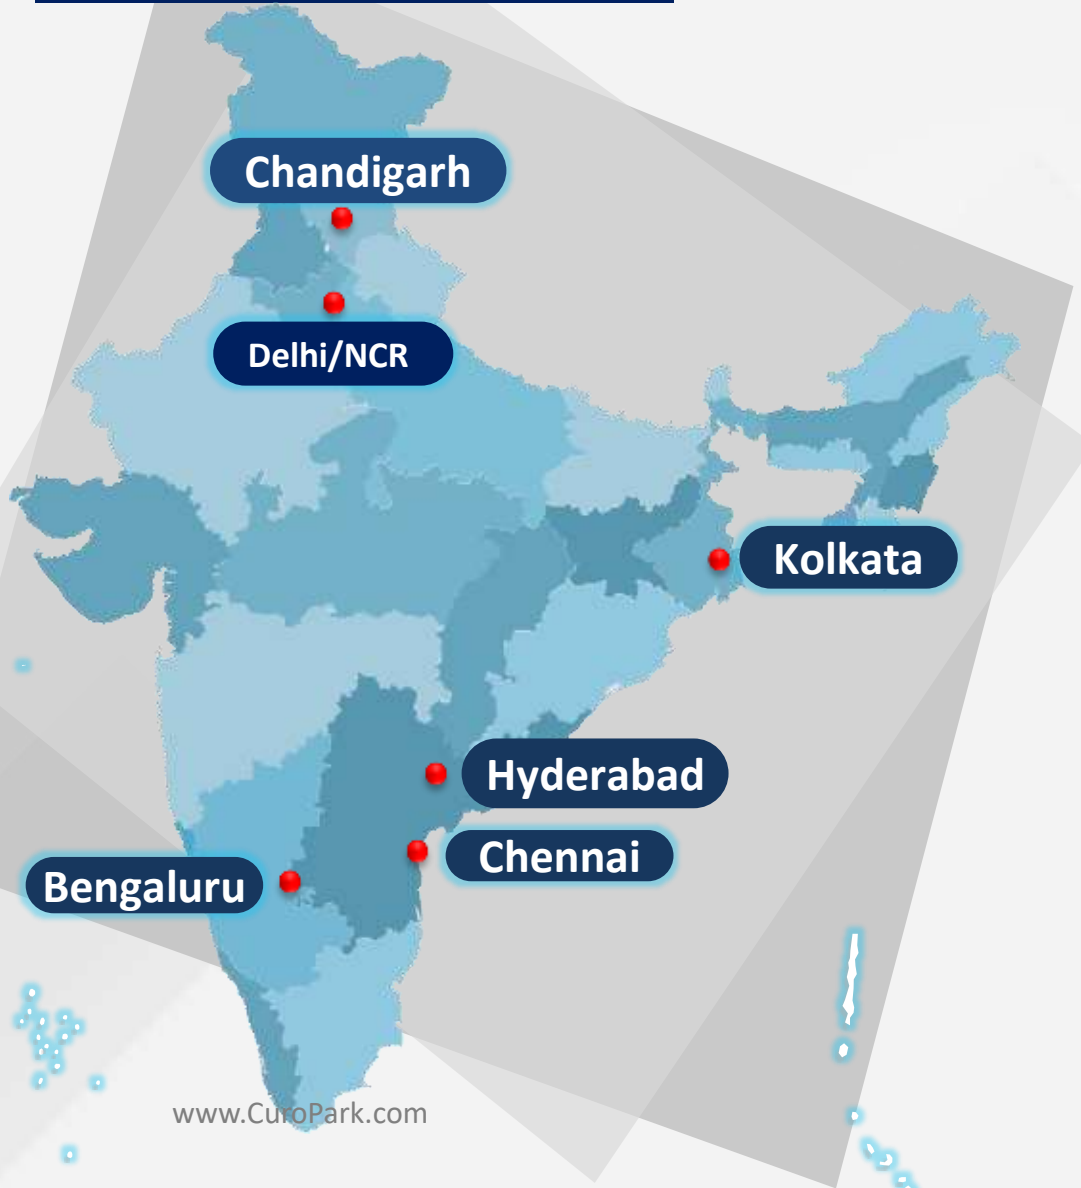

- Get access through FASTag or ticket from ticket dispenser
- Make payment at exit payment-counter digitally.
