About CuroVMS

- CuroVMS is a cloud-based visitor management software for commercial multi-tenant buildings. It is integrated with CuroPark to manage visitors along with parking seamlessly from single platform. Solution helps in modernizing front desk, easily manage visitors, fast and secure access of visitors.

- CuroVMS is an intelligent visitor management system that helps automate visitor registration, check-in/check-out and automate visitor gates/turnstile. Solution also helps in managing and analyzing visitors' visits using real-time dashboard and reporting

Why Do We Need Touchless VMS?

With businesses trying to adapt to the new and evolved ways of thriving in the current COVID situation, the idea of **touchless visitor management systems** are gaining huge popularity and is a sure-shot way to make your office premise technologically adept and secure.
